

ABSTRACT

5 A battery pack detachably connected to an  
information processing apparatus, wherein the  
information processing apparatus includes a body  
part and a display part supported by the body part  
and thereby the display part can be opened and  
closed against the body part, includes a housing  
part having a hollow part in which a battery can be  
housed, wherein the hollow part is situated at a  
10 position which faces an end part of the display part  
when the display part is closed.
